CREATE A PASSKEY

Passkeys provide a more secure and efficient way for logging into your account. By using a passkey, you can login using facial recognition or touch ID. If you decide to continue without biometrics on initial logon, you will need to enter your login credentials each time you open the app. If you wish to set this up at a later date you can do so via the 'Me' > 'My Account' area.

Viewing As

VIEWING AS

Across various pages of the portal there is an option to change the persona you are viewing as. This allows you to see different data determined by your selection, whether this is viewing as yourself, partner or any other linked entities for example a trust or company.

To change this view, press the drop-down arrow which will then display the options available. Within the app, this can be done via the 'Me' icon in the top right corner.

Data across the portal including net worth values and investments will update in accordance with the selected view.

To create your own group view, navigate to the 'Me' > 'My account' area on the portal website and select 'My Views'. If you have a related partner entity you will see a 'Combined' group which has been set up by default, should you wish to use it.

1 Click 'Add View' and enter a name which will be visible within the 'Viewing As' dropdown.

2 Tick the related entities which you would like to include and click 'Save Changes'.

Please note, ticking 'Owners of holdings displayed must match parties included in this view' will mean that only assets, liabilities or investments which you own or partly own will be visible. If you wish to view all data that you're permitted to see against your related entities, leave this unticked.

3 This view will now be available to select within the 'Viewing As' dropdown across the portal.

4 To change the default view which displays each time you login, you can do so via the dropdown arrows. This will update the next time you login. Here you also have the option to delete or rename the views which you have created.
